Experience

Technology Coordinator / Instructional Coach, Mamaroneck Schools

Mamaroneck, New York, 2015 - Present

- Responsible for short and long-term technology planning, budgeting, purchasing, and staff development
- Planned and managed district-wide transition to Google Apps for Education for all students and staff
- Extensive development of innovative instructional approaches and training to bring them to the classroom.
- Provided professional learning experiences to support secondary science teachers transition to the Next Generation Science Standards
- Assisted in the conception, design and implementation of new academic programming, including digital citizenship, computer science, journalism, entrepreneurial incubator, literacy and independent reading, etc.
- Coordinated a complete rebuild of the district website and content management system
- Managed 1:1 technology program for 5,000+ students, including a shift from district-owned device usage to a "bring-your-own-device" model

Co-Founder / Director of Technology, STEM Leadership Center

White Plains, New York, 2012 - Present

- Co-Founder and Technology Director of nonprofit corporation which provides after-school NGSS-informed STEM programs for students and professional development for teachers
- Responsible for all technology planning, purchasing, managing, and instructing
- Aided in the design and implementation of the Regeneron STEM Teaching Fellowship
- Designed all marketing materials including logo, brochures, press releases, including the complete design and construction of the company's online presence (website, social media).
- Designed and delivered professional development for teachers and administrators in technology integration which included iOS devices, web tools, instructional design and digital communication

Science Teacher, Hommocks Middle School

Mamaroneck, New York, 2004 - Present

- Managed a 1:1 iPad pilot program for 400+ 8th grade science students, including all teacher training
- Designed professional development courses on technology integration and curriculum design
- Wrote and was awarded multiple technology grants allowing for the purchase of a digital recording studio, one-to-one iPod Touches, classroom iPads, and classroom Smartboards.
- Designed, built and maintained an online classroom complete with a weblog, digital grade-book, online lab activities, and over 100 topical review videos
- Led Instructional Technology committee, developed and carried out multiple research studies

Professional Development Facilitator, Westchester Teacher Center

Pelham, New York, 2010 - 2014
